

Meet and exceed
SEC and FINRA requirements
for information security and
compliance with our cloud-first
infrastructure and risk-based data
management services.

1. Customize

Our team of software experts will tailor a turnkey data management platform to address your unique regulatory and functional needs.

2. Integrate

Platform operates seamlessly behind the scenes of your existing legacy data sources to protect your data wherever it may go.

3. Comply

Adopt a cloud-first information technology strategy to comply with the latest guidance on information protection and retention.

Compliance

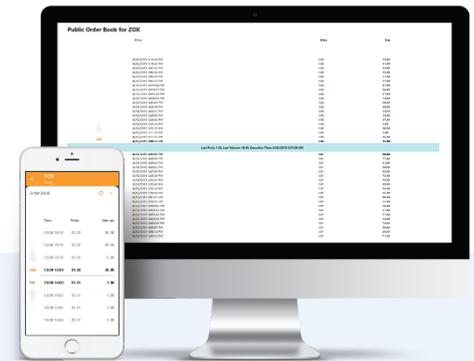

- Compliance with SEC Rules 17a-3/4, FINRA Rule 4511, and section 500.13 of 23 NYCRR 500
- Leverage our team of Wall Street and software pioneers with 25+ years of experience
- Features include customized retention, preservation policies, audit trail, and version storing that enforce compliance

Governance

- Utilize a Governance framework based upon the National Institute of Standards and Technology (NIST)
- Ensure that you have the policies and procedures to manage your organization's regulatory and operational requirements
- Understand your business' risk position with regards to compliance and cybersecurity

Security

- Secure your information at the resource level to meet the challenges of information security in a modern workplace
- Implement a robust cybersecurity program across all information channels
- Join a joint risk assessment program to evaluate new threats and vulnerabilities
